

## Cunningham Flood Detention Facility Certification Project Current Status & Neighborhood Impact

Construction crews are currently deployed on-site. Potential impacts to the neighborhood would be construction noise, dust and traffic. A new pedestrian entrance to the park will be created as the current entrance at the corner of Cunningham Avenue and South White Road will be closed during construction. A sidewalk closure on one side of Cunningham Avenue is also planned. The pedestrian detour will be located across the street on the northern side of Cunningham Avenue. Please see the diagrams for detour routes.

Work hours are Monday through Friday, 7 a.m. - 5 p.m. To ensure timely completion of the project, construction may occur on Saturdays, 8 a.m. - 5 p.m.
