

PLACEMENT OF FILL AND PLANTING OF TREES BY LEVEES

Plants with large root systems (trees and large shrubs) should not be placed on existing levees.

Trees may be planted on a levee if additional fill is placed on the levee.

The placement of fill on/next to the out board slope of the levee will reduce the height of the levee for aesthetics and improves the safety of the levee system. The height of the fill may vary. Geotechnical analyses may be needed to determine the impacts of the fill to the levee slope.
