

Safe, Clean Water
and Natural Flood Protection

San Tomas Aquino Creek Erosion Repair Project

San Tomas Aquino Creek facing south toward Hamilton Avenue.

We're working in your neighborhood creek!

The San Tomas Aquino Creek Erosion Repair Project will restore the creek to its as-built condition. The work includes placing new concrete on the existing channel bottom and repair of channel side slopes. This maintenance project will prolong the life of our infrastructure, reduce future costs and allow for storm water to safely pass through. The project site is an approximate 2.1-mile stretch from just south of Williams Road in the City of San José to near Virginia Avenue in the City of Campbell.

San Tomas Aquino Creek Erosion Repair Project

What to Expect

Construction is slated to begin in late June 2019 with a planned completion by the end of September 2019.

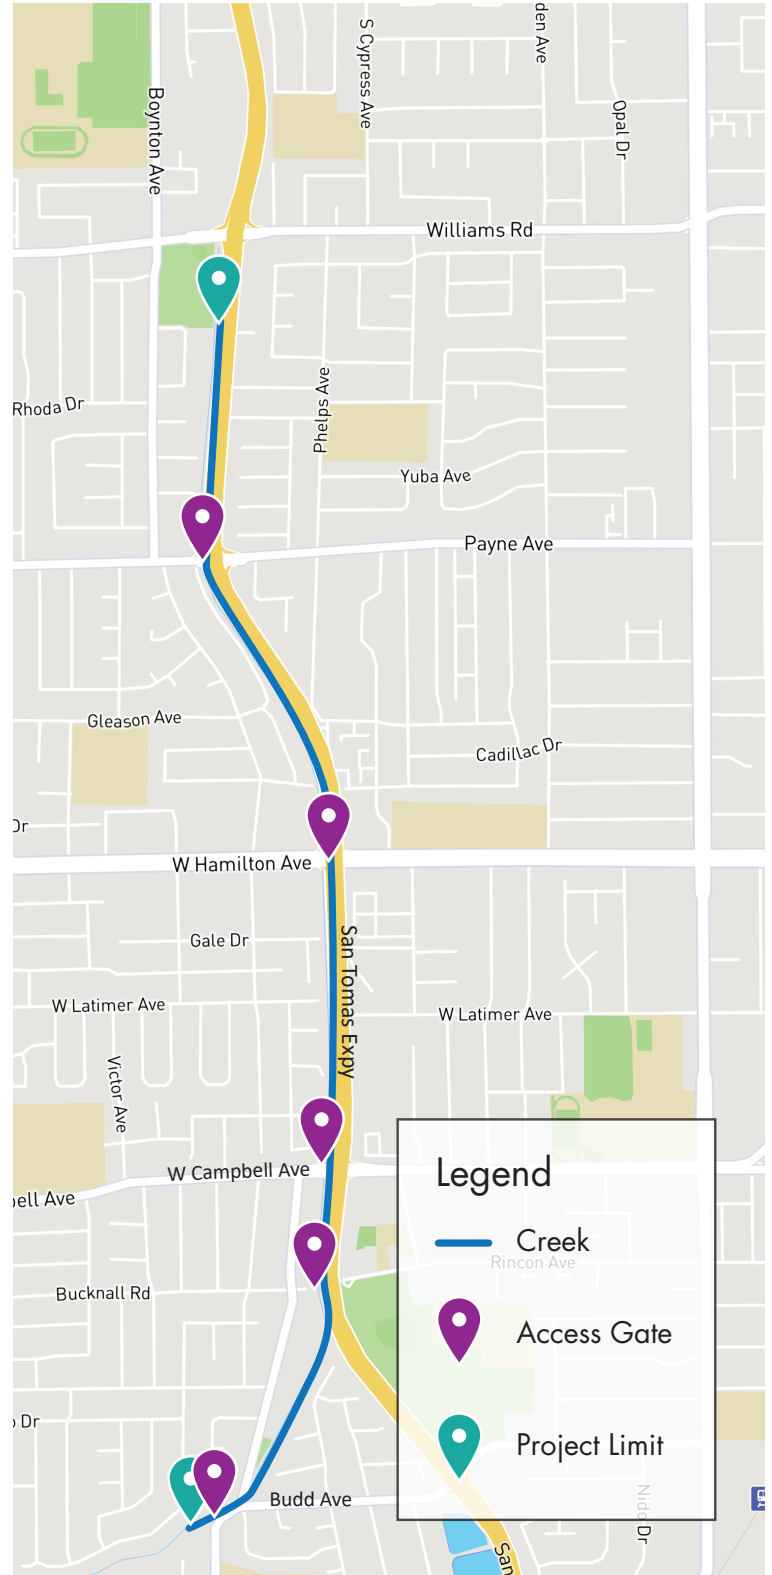

Work in the City of Campbell will occur between the hours of 8 a.m. and 5 p.m., Monday through Friday. Work in the City of San José will occur between 7 a.m. and 5 p.m., Monday through Friday.

Work crews will use heavy machinery, trucks and tools such as concrete mixers, pump trucks, excavators, dump trucks and other miscellaneous equipment. When warranted, water trucks will be used to control dust.

Residents can expect typical construction noise, dust from operating heavy equipment, and an increase of traffic volume near the project site limits and on San Tomas Expressway. Traffic control efforts, and temporary lane closures on San Tomas Expressway are also anticipated. Construction crews and equipment will be accessing the creek through gates at Payne, Hamilton, Campbell, Rincon and Virginia Avenues. Crews will be parking vehicles and equipment at an identified site off Virginia Avenue.

San Tomas Aquino Creek near Williams Road (northern project limit).

About Valley Water

Valley Water manages an integrated water resources system that includes the supply of clean, safe water, flood protection and stewardship of streams on behalf of Santa Clara County's 2 million residents. Valley Water is the flood control agency for Santa Clara County, annually preparing creeks for winter rains through levee maintenance, sediment removal, bank repair and vegetation management. We have invested more than \$1 billion in flood protection efforts to protect nearly 100,000 parcels with many more projects planned. Valley Water performs work annually under its Stream Maintenance Program to repair damages to creeks to reduce the risk of flooding and keep our communities safe.
