

We are working in your neighborhood creek!

Calabazas Creek Bank Stabilization Project

The Santa Clara Valley Water District is repairing an eroded bank site along Calabazas Creek.

When complete, this project will repair 165 linear feet of creek bank to provide bank stabilization and minimize erosion. Securing the creek bank protects homes and property along the creek. It also minimizes sediment build-up, improving the creek's capacity to carry floodwaters while maintaining a stable and healthy creek ecosystem. We are dedicated to keeping residents and businesses safe through our flood protection programs.

What to expect

Work began early September and the project will take approximately 35 days to complete.* Work hours are 8 a.m. to 4 p.m., Monday through Friday. In the unlikely event of delays, work hours may include Saturday.

A five-person crew at the project site will use an excavator, small loader and dump and crew trucks. Expect typical construction noise and dust from heavy equipment during work hours.

Trucks and crews are accessing the creek upstream (south) of Bollinger Road. Expect no trail or road closures, but flaggers will be on site during hauling trucks ingress or egress on the driveway.

* Project start dates and duration may vary due to site conditions and equipment availability.
