

We are working in your neighborhood creek!

Lower Silver Creek Sediment Removal

The Santa Clara Valley Water District is removing sediment from Lower Silver Creek downstream from McKee Road in San Jose.

Removing sediment that has built up within the creek will restore channel capacity, minimize sediment build-up in the future and maintain the creek's capacity to carry floodwaters while sustaining a stable and healthy creek ecosystem.

What to expect

Work began July 11th and will take approximately 4 weeks to complete.* Work hours are 8 a.m. to 4 p.m., Monday through Friday. In the unlikely event of delays, work hours may include Saturday.

A five- to ten-person crew is working at the project site using an excavator, a loader, dump trucks, water trucks and street sweepers. A generator, designed to operate quietly, is pumping water as needed around the project site and back into the creek farther downstream. Expect typical construction noise during work hours from operating heavy equipment.

Trucks and crews are accessing the creek from Marburg Way and North King Road. Expect no road closures, but traffic control or flaggers may be needed at times during work for safety.

**Project start dates and duration may vary due to site conditions and equipment availability.*
