Board correspondence has been removed from the online posting of the Non-Agenda to protect personal contact information. Lengthy reports/attachments may also be removed due to file size limitations. Copies of board correspondence and/or reports/attachments are available by submitting a public records request to publicrecords@valleywater.org.
CEO BULLETIN
Outlook as of July 1, 2020

We began calendar year 2020 with groundwater storage well within Stage 1 (Normal) of the Water Shortage Contingency Plan of Valley Water. Despite well below-normal local rainfall and statewide snow pack, end of year groundwater storage for 2020 is projected to be well within Stage 1.

**Weather**

Rainfall in San Jose:
- Month of June, City of San Jose = 0.00 inch
- Rainfall year total = 8.82 inches or 62% of average to date (rainfall year is July 1 to June 30)
- Month of June, San Jose average daily high temperature = 82.8 degrees Fahrenheit

**Local Reservoirs**

- Total July 1 storage = 61,462 acre-feet
  - 63% of 20-year average for that date
  - 37% of total unrestricted capacity
  - 55% of restricted capacity (166,266 acre-feet total storage capacity limited by seismic restrictions to 111,421 acre-feet)
- Approximately 716.6 acre-feet of imported water delivered into local reservoirs during June 2020
- Total estimated releases to streams (local and imported water) during June was 6,650 acre-feet (based on preliminary hydrologic data)

**Treated Water**

- Above average demands of 11,285 acre-feet delivered in June
- This total is 103% of the five-year average for the month of June
- Year-to-date deliveries = 43,343 acre-feet or 101% of the five-year average

**Groundwater**

- Groundwater conditions are good. Total storage at the end of 2020 is projected to be in Stage 1 (Normal) of Valley Water’s Water Shortage Contingency Plan.

continued on back
Imported Water

- Current 2020 State Water Project (SWP) and Central Valley Project (CVP) allocations:
  » 2020 SWP allocation of 20%, which provides 20,000 acre-feet to Valley Water
  » 2020 South-of-Delta CVP allocations are 70% for M&I and 20% for Agriculture, which provide 97,620 acre-feet to Valley Water
- Statewide reservoir storage information, as of July 1, 2020:
  » Shasta Reservoir at 69% of capacity (86% of average for this date)
  » Oroville Reservoir at 61% of capacity (75% of average for this date)
  » San Luis Reservoir at 52% of capacity (83% of average for this date)
- Valley Water’s Semitropic groundwater bank reserves are at 99% of capacity, or 347,757 acre-feet, as of May 31, 2020
- Estimated SFPUC deliveries to Santa Clara County:
  » Month of May = 3,594 acre-feet
  » 2020 total to date = 13,670 acre-feet
  » Five-year annual average = 48,700 acre-feet
- Board Governance Policy No. EL-5.3.3 includes keeping the Board informed of imported water management activities on an ongoing basis. No imported water agreements were executed under EL-5.3.3 since the last Water Tracker update

Conserved Water

- Saved 73,531 acre-feet in FY19 from long-term program (baseline year is 1992). This will be updated in July for FY20
- Long-term program goal is to save nearly 100,000 acre-feet by 2030 and 110,000 acre-feet by 2040
- The Board continues its call for a 20% reduction and a limit of three days per week for irrigation of ornamental landscape with potable water
- Through May, achieved a 17% reduction in water use in calendar year 2020, compared to 2013

Recycled Water

- Estimated June 2020 production = 2,090 acre-feet
- Estimated year-to-date through June = 7,940 acre-feet or 119% of the five-year average
- Silicon Valley Advanced Water Purification Center produced an estimated 1.5 billion gallons (4,570 acre-feet) of purified water in 2019. Since the beginning of 2020, about 1,810 acre-feet of purified water has been produced. The purified water is blended with existing tertiary recycled water for South Bay Water Recycling Program customers

Alternative Sources

- As of December 10, 2019, Valley Water’s wastewater contract right from Palo Alto/Mountain View remains at 10,000 acre-feet/year
BOARD MEMBER REQUESTS
and Informational Items
TO: Board of Directors  
FROM: Melanie Richardson  
SUBJECT: Fiscal Years 2021-25 Capital Improvement Program  
DATE: July 7, 2020

Introduction

The Santa Clara Valley Water District’s (Valley Water) Fiscal Year (FY) 2021-25 Five-Year Capital Improvement Program (CIP) is a projection of Valley Water’s capital funding for planned capital projects from FY 2020-21 through FY 2024-25. The purpose of the CIP is to document planned Valley Water projects to help integrate Valley Water work with the larger community by aligning Valley Water planning with other local agency planning efforts. The five-year rolling CIP is developed in alignment with the annual budget process.

Valley Water’s CIP is developed following the guidelines of Government Code (GC) § 65403 which governs the development and annual review of Capital Improvement Programs developed by special districts in the State of California. State law requires that the program be reviewed and updated annually. It also requires circulation of the document to all agencies having land use authority within Valley Water boundaries prior to adoption of the program. This document is intended to provide the information necessary to facilitate planning and construction of water-related infrastructure to meet the needs of Santa Clara County.

The Draft FY 2021-25 CIP was presented to the Board at the February 25, 2020 Board Meeting and subsequently the Board authorized the release of the Draft CIP for public review. The Draft CIP was then transmitted to the Town of Los Gatos and all cities within Valley Water’s jurisdiction, the County of Santa Clara, the San Jose Water Company, and the Mid-Peninsula Open Space District. Valley Water offered to meet with each of these agencies, and ultimately met with the planning and public works staff at the City of Santa Clara, City of San Jose, and the County of Santa Clara to discuss projects and solicit feedback on the Draft CIP.

At the April 28, 2020 Board Meeting, the public hearing was opened to receive comments regarding the Draft FY 2021-25 CIP. On May 26, 2020 the Board of Directors closed the public hearing and directed staff to include appropriate changes and finalize the FY 2021-25 CIP for release on June 30, 2020, which is available online for information and reference at [https://www.valleywater.org/how-we-operate/five-year-capital-improvement-program](https://www.valleywater.org/how-we-operate/five-year-capital-improvement-program). Hard copies are available for the Board through the Clerk of the Board’s Office and for the general public upon request.

Financial Overview

The Final FY 2021-25 CIP includes 67 projects totaling approximately $6.5 billion. An estimated 19 percent of this amount, $1.218 billion, is anticipated to be funded by outside sources through reimbursements and cost-sharing partnerships. The program includes water supply, flood protection, water resources stewardship, buildings and grounds and information technology projects.

Projects in the CIP will improve, repair, replace, or construct infrastructure. There are 31 Water Supply projects ($4 billion), 17 projects to increase flood protection ($1.7 billion), 10 environmental restoration, enhancement and mitigation projects ($176 million), 2 projects to repair or maintain Valley Water buildings and grounds ($48 million), and 7 projects to upgrade or expand existing information technology ($53 million).
