Potential South County Groundwater Benefit Zone Changes

2. Rate impacts are estimated based on adopted FY 2018 rates. Assumes 2,500 cubic feet groundwater use per month based on average domestic pumping in Santa Clara County. Impact will vary depending on groundwater use and final rate adopted. AF = Acre-Foot or 325,851 gallons.

3. Information is subject to change. Any change to a groundwater benefit zone or rate must be approved by the Valley Water Board of Directors.
