## GENERAL QUESTIONS AND RESPONSES

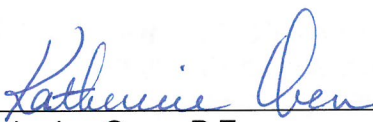

Question No.	P3 RFQ Section	Question/Response
25.	Section 3.1.1.	<b>Question:</b> Would the District accept a 30% design as part of the RFP if it resulted in a GMP at the proposal stage for the P3 option? i.e., shortening the Stage 1 process.

Question No.	P3 RFQ Section	Question/Response
		<p><b>Response:</b> This District will consider this and more details will be outlined in the RFP stage.</p>
26.		<p><b>Question:</b> The inflation calculator at the link provided in the RFQ only works up to \$10 M. May another source be used for converting to 2015 dollars, such as <a href="http://www.usinflationcalculator.com/">http://www.usinflationcalculator.com/</a> for calculating the inflation?</p> <p><b>Response:</b> Respondents may work around this limitation in the inflation calculator by dividing the input value by 1000 and then multiplying the output value by 1000.</p>
27.	Section 3.3.	<p><b>Question:</b> Is there a PLA that will be part of this Project? Is there an opportunity to discuss arguments against a PLA? NO PLA.</p> <p><b>Response:</b> Please see response to Question 10 from P3 Addendum #2.</p>
28.	Section 3.1.	<p><b>Question:</b> When will Draft contracts be available to proposers?</p> <p><b>Response:</b> The District anticipates providing a draft termsheet for the P3 Project to shortlisted Respondents prior to release of the RFP.</p>
29.	Section 2.2.	<p><b>Question:</b> Would the district accept a P3 proposal for the plant expansion only, with the offsite / pipelines / recharge basins / injection wells procured as a separate project under the Design/Build track?</p> <p><b>Response:</b> The District would consider a P3 proposal for the SVAWPC Expansion Project only. A Respondent making such a proposal should identify the specific benefits to the District of a P3 Project definition that only includes this component. It should be noted that a limited scope in the submittal may impact the score/ranking of such a respondent, unless the respondent can demonstrate why such a proposal would be superior.</p>

Question No.	P3 RFQ Section	Question/Response
30.		<p><b>Question:</b> Would the district be interested in a project that produced more than 45,000 af/y? If yes, what would be the maximum volume the district would be interested in?</p> <p><b>Response:</b> While the District welcomes creative ideas from Respondents, a project with production capacity in excess of 45,000 is beyond the current scope of procurement.</p>
31.	Section 4.3.	<p><b>Question:</b> Is it possible that the District would consider an extension to the deadline to submit a completed SOQ for the P3 process? The complexity of the dual process is making solidifying a P3 team more difficult and if we could get another two weeks it would improve our submittal.</p> <p><b>Response:</b> Please see revised Section 4.3. Procurement Schedule.</p>
32.	Section 5.C.	<p><b>Question:</b> In Section 5C (page 30), the language provides guidance on the submittal by Volumes 1 and 2. On page 56, it requires that the Appendix 1 SOQ Transmittal Form be attached. Should this be form be attached to Volume 1 or 2?</p> <p><b>Response:</b> The requirements of Part I Section C "Execution and Certification" are satisfied by execution and certification of Appendix 1: Proposer Form. Respondents should include the executed and certified Appendix 1: Proposer Form as part of Volume 2.</p>

THIS ADDENDUM NO 4, WHICH CONTAINS 4 PAGES, IS ATTACHED TO AND IS A PART OF THE RFQ FOR PUBLIC-PRIVATE PARTNERSHIP SERVICES FOR THIS PROJECT.
