

## We are working in your neighborhood creek!

### Calabazas Creek Sediment Removal Project

The Santa Clara Valley Water District is removing sediment from Calabazas Creek from Tasman Drive to upstream of Highway 101 in the cities of Sunnyvale and Santa Clara.

Removing sediment that has built up within the creek will restore channel capacity, minimize sediment build up in the future and maintain the creek's capacity to carry floodwaters while sustaining a stable and healthy creek ecosystem. We are dedicated to keeping residents and businesses safe through our flood protection programs.

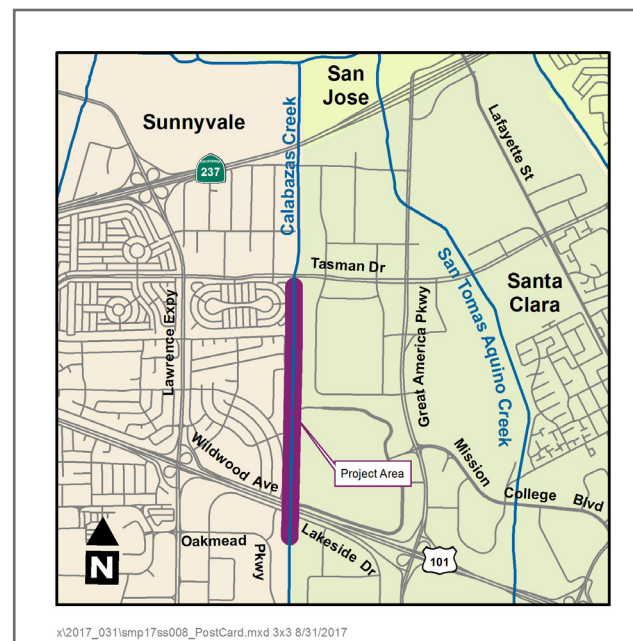

### What to expect

Work began in early September and will take about 60 days to complete.\* Work hours are 8 a.m. to 4 p.m., Monday through Friday. In the unlikely event of delays, work hours may include Saturday.

A five-person crew will use an excavator, small loader, dump and crew trucks and a quiet generator to keep the creek under dry conditions around the clock. Expect typical construction noise and dust during work hours from equipment.

Trucks and crews are accessing the creek from Tasman Drive, Wildwood Avenue and Lakeside Drive. Expect no trail or road closures, but traffic control or flaggers may be needed at times during work for safety.

\* Project start dates and duration may vary due to site conditions and equipment availability.
