

# CLIMATE CHANGE

Changing Rain  
and Snow  
Patterns

Changes in Animal  
Migration and Life Cycles

Less  
Snow and Ice

Higher Temperatures  
and More Heat Waves

More Droughts  
and Wildfires

Thawing  
Permafrost

Stronger  
Storms

Damaged  
Corals

Rising  
Sea Level

Warmer  
Oceans

Changes in  
Plant Life Cycles
