

# Coyote Creek Levee Repairs Upstream & Downstream of Highway 237

## Construction is heading your way

The Santa Clara Valley Water District is dedicated to keeping residents and businesses safe through its maintenance repair projects. In this effort, two projects will occur, the Coyote Creek Levee Repair Upstream of Highway 237 in San José and the Coyote Creek Levee Repairs Downstream of Highway 237 in Milpitas. Construction is scheduled to begin on June 15 and run through Sept. 15, 2018.

This project will repair damage due to burrowing rodents along the most critical areas where a substantial number of holes have emerged within the levees immediately downstream and upstream of Highway 237. The maintenance work includes

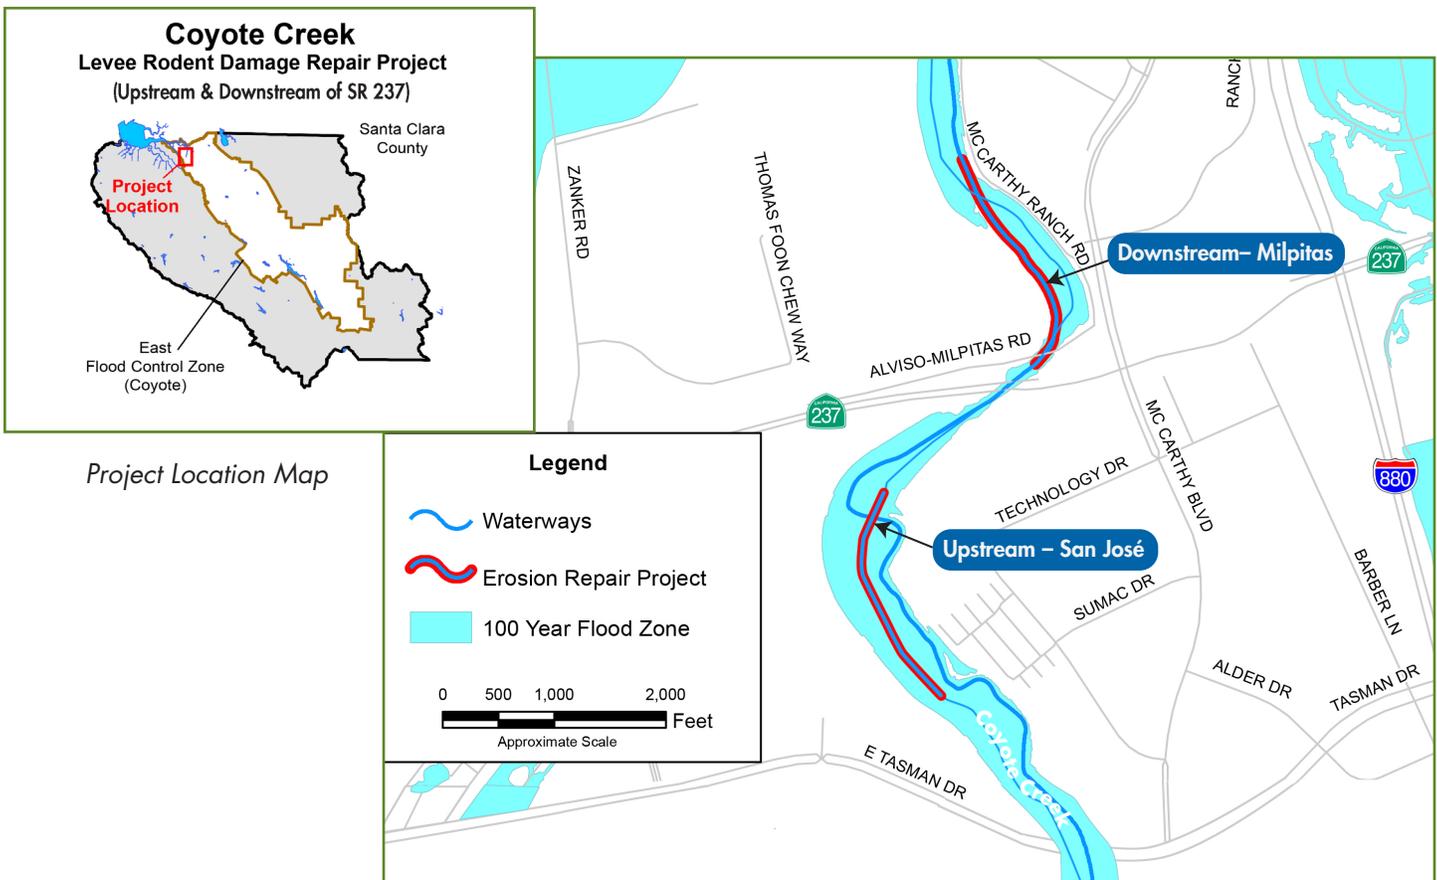

rebuilding and reinforcing the existing levee to reduce the risk of Coyote Creek flooding during high rainstorm events.

## What to expect during construction?

The Santa Clara Valley Water District will do its best to minimize construction impact as much as practical and in accordance with city ordinances. We appreciate your understanding and cooperation as work progresses on this project to repair the levees along Coyote Creek.

- Work hours can range from 7 a.m. to 5 p.m. in accordance with local city ordinances and permits.

An example of rodent damage encountered on the Coyote Creek levees.

- Trailways adjacent to the construction sites will be closed for the duration of the construction period June 15, 2018 through Sept. 15, 2018. Detour information will be included as soon as available.
- On the Coyote Creek Levee Repair Upstream of Highway 237 in San José, construction vehicles will be entering the job site via the Cisco Building 7 (425 E. Tasman Drive) parking lot.
- Expect typical construction noise during work hours from hauling trucks, excavators, roller compactors, dozers, pumps and generators.

Please use extreme caution in areas nearby and be sure to stay outside of construction zones.

Construction costs are estimated at \$800,000 to \$1.4 million for the Coyote Creek Levee Repair Downstream of Highway 237 (Milpitas) Project, and \$900,000 to \$1.5 million for the Coyote Creek Levee Repair Upstream of Highway 237 (San José) Project.

For more information on the Coyote Creek Trail, see the [City of San José Coyote Creek](#) website.
