Guadalupe River Bank Repair

The Santa Clara Valley Water District is repairing an eroded bank site along Guadalupe River at the Laurelwood Pump Station outfall, just north of Trimble Road in Santa Clara.

When complete, this project will repair 30 feet of erosion beneath the Laurelwood Pump Station outfall. The work will line the structure with rock to prevent future erosion of the site. The repairs will also restore the floodplain and maintain the creek's capacity to carry floodwaters while sustaining a stable and healthy creek ecosystem.

What to expect

Work began on August 21 and will take approximately four weeks to complete.* Work hours are 8 a.m. to 4 p.m., Monday through Friday. In the unlikely event of delays, work hours may include Saturday.

A five-person crew is working at the project site using an excavator, a loader, dump trucks, water trucks and street sweepers. Expect typical construction noise from heavy equipment during work hours.

Trucks and crews are accessing the channel from a gate on Laurelwood Road adjacent to the Laurelwood Pump Station. Trimble Road and Montague Expressway may be used for some equipment access. Expect no road closures, but there may be traffic control or flaggers at times during work for safety.

** Project start dates and duration may vary due to site conditions and equipment availability.*
