

## Session Three Learning Objectives

### Session 3: *Watershed Works in Action*

Session will cover:

- Watersheds Overview
- South San Francisco Bay Shoreline Project
- Downtown Guadalupe River Flood Protection
- Interactive Cohort Engagement
- Safe Clean Water & Natural Flood Protection Program
- Valley Water's Grant and Community Partnership opportunities

**By the end of session three:**

1. Ambassadors will have a better understanding of local watersheds and Valley Water's programs and partnerships that support them.
2. Ambassadors will have a better understanding of the South San Francisco Shoreline Project and how it will protect the community from flooding and sea-level rise, and support and protect Bay ecosystems.
3. Ambassadors will have a better understanding of flood protection projects and the Downtown Guadalupe River Flood Protection Project.
4. Ambassadors will have a better understanding of the Safe, Clean Water & Natural Flood Protection Program and how it facilitates programs and projects that ensure reliable water supplies, reduce waterway contamination, strengthen water infrastructure, restore environmental ecosystems, and provide flood protection.
5. Ambassadors will have a better understanding of Valley Water's grants and community partnership programs.
