Subject: Regular-Rate Records Search Request- Sunnyvale East and West Channel Flood Protection Project, Santa Clara County

Dear Ms. Jordan:

ICF will provide cultural resource compliance services to Horizon for the Sunnyvale East and West Channel Flood Protection Project (the Project). The Project was initiated by the Santa Clara Valley Water District's (SCVWD's) Clean, Safe Creeks and Natural Flood Protection Program (CSC). The CSC is a multi-objective program intended to provide flood protection to Santa Clara Co. residents and infrastructure and improve water quality and natural conditions. In support of the CSC, the Project will improve flood protection, erosion control, water quality, and environmental recreational conditions.

Please search the project areas and a **half-mile** search radius for the following:

- Plotted locations and a list of all recorded sites from the Historic Properties Directory, the California Inventory of Historic Resources, the Historic Property Data File, and any local inventories.
- Current status of each site: National Register status (formally determined eligible/not eligible, recommended eligible/not eligible by agency, recommended eligible/not eligible by consultant).
- Copies of entire site records.
- A bibliographic reference of all survey reports.
- Copies of GLO plats and any other historic materials/maps.
- Information on any Historic District(s).

Thank you for your assistance! Please contact me with any questions or concerns regarding this project.

Sincerely,

Joanne S. Grant, RPA

Enclosure: 2 maps. I found that when I printed them out at an 80% size, they were indeed at a 1:24,000 scale.
