

We are working in your neighborhood creek!

Thompson/Lower Silver Creek Sediment Removal

The Santa Clara Valley Water District is removing sediment from Thompson/Lower Silver Creek from Tully to Quimby roads in San Jose.

Removing sediment that has built up within the creek will restore channel capacity, minimize sediment build-up and maintain the creek's capacity to carry floodwaters while sustaining a stable and healthy creek ecosystem.

What to expect

Work began in mid-September and is expected to take approximately eight weeks to complete. * Work hours are 8 a.m. and 4 p.m., Monday through Friday. In the unlikely event of delays, work hours may include Saturday.

A five- to 10-person crew is working at the project site using excavators, loaders, dump trucks, water trucks and street sweepers. A generator designed to operate quietly, is pumping water as needed around the project site and back into the creek further downstream. Expect typical construction noise during work hours from operating heavy equipment.

Trucks and crews are accessing the creek from Capitol Expressway and Tully and White roads. Expect no road closures, but traffic control or flaggers may be needed at times during work for safety. The project is requiring some closure of the Thompson Creek Trail, but light use is allowed on some portions.

* *Project start dates and duration may vary due to site conditions and equipment availability.*
