

Water Efficient Technology

WET Rebate

Receive up to \$50,000 for installing water efficient technology!

SAVE WATER

SAVE MONEY

**A customized rebate for businesses
and institutions**

The Santa Clara Valley Water District provides Silicon Valley with safe, clean water for a healthy life, environment and economy.

Benefits

- Modernize your facility with the latest water efficient technology
- Save money on your water bill – and possibly your energy bill, too
- Demonstrate that your business is a water conservation leader

Qualifying Equipment

- Onsite water reuse
 - Treated wastewater used again at the facility
 - Untreated process water used for a different purpose
- Cooling tower efficiency upgrades
- Chiller efficiency upgrades (e.g. air cooled)
- Any other equipment that results in measurable water savings

Simple Application Process

1. Submit the application **before** the equipment is installed.
2. Purchase and install equipment **after** receiving a Notice to Proceed.
3. Meet requirements and submit paperwork.

Rebate Amount

\$4 per CCF of water saved per year by installed equipment, up to 50% of the equipment cost (1 CCF = 748 gallons). The maximum rebate is \$50,000 per project, and the minimum is \$400 per project.

Note: All programs are subject to funding availability and program restrictions.
